ABSTRACT

This study were done in poultry farm of college of agriculture animal resources department to investigate the Effects of Adding *Zingiber Officinale* Aqueous Extract to Semen Dilution Lake on Semen Characteristic of Broilers Breeder Ross308. The concentration of treatments were (0,2,4&6)ml/100ml of lake dilution (Controll,T1,T2,T3),the Characteristic were study (sperm movements, dead &abnormal)% and after (30,60,90)mints of dilution . The results showed that T1 was significant effect(p<0.05) on control and another treatments and the period 30 mints in significant effect(p<0.05)on period(60&90) mints, and the dead &abnormal sperm of T1on significant effect(p<0.05) on control and another treatments and the period 30 mints in significant effect(p<0.05)on period(60&90) mints.
